

# Introduction

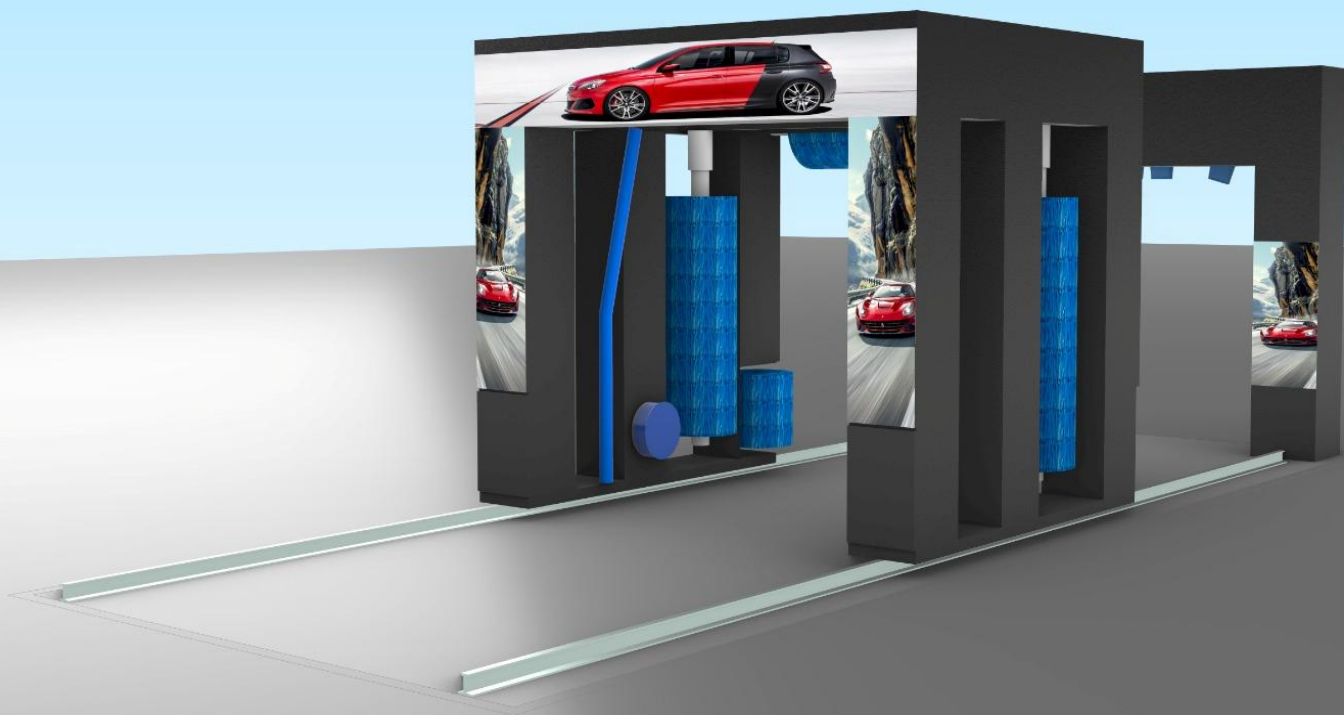

Starwash Corp is a professional automatic car wash machine provider specializing in advanced vehicle cleaning technologies. Our company designs and manufactures commercial grade modern machines and software, which are both user friendly and incorporate cutting-edge technology.

Starwash machines represent a significant leap beyond outdated industry standards, incorporating industry-first features such as: touch and touchless all-in-one wash systems, unattended sites, high speed wash times, multi-layer subscription and purchasing options, auto-on operation, and self-diagnosing equipment with remote access. Our scalable solutions offer advanced software integration while operating with eco-friendly practices using efficient water usage (85% water reclaim system). Reliable, modern & easy to maintain with an industry-leading warranty: the Starwash advantage.

With Starwash, you're not just choosing a product; you're choosing a partnership dedicated to your success, ensuring your car wash stands out in a competitive market.

# Hybridwash Rollover

Starwash's Hybridwash is an innovative car wash system that combines touchless and touch-based washing in a single bay. This versatile solution offers customers the choice between high-pressure touch-less cleaning or a soft-touch brush wash, delivering thorough cleaning in as little as 3 minutes. The system's compact design and efficiency make it ideal for smaller spaces while serving a wide range of customer preferences.

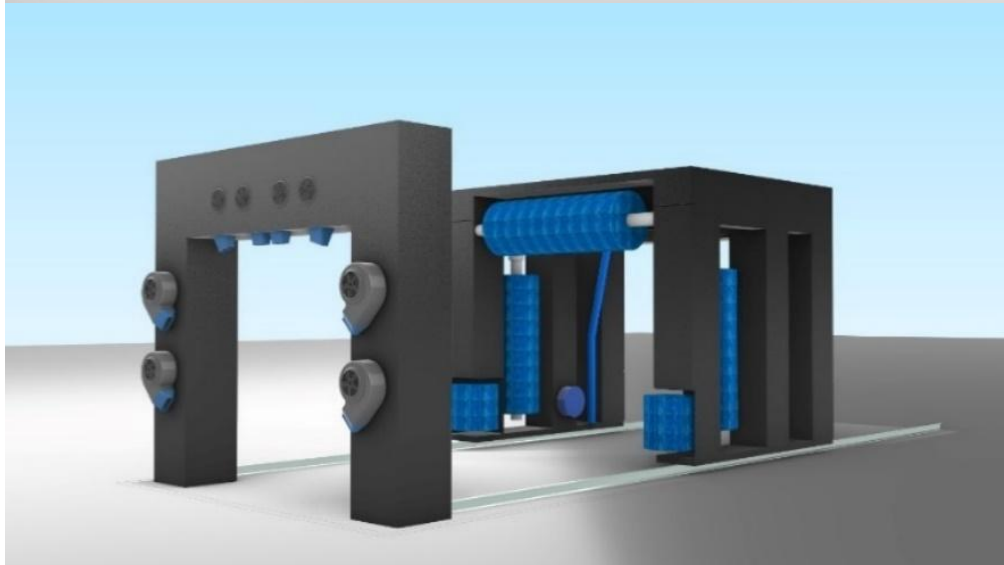

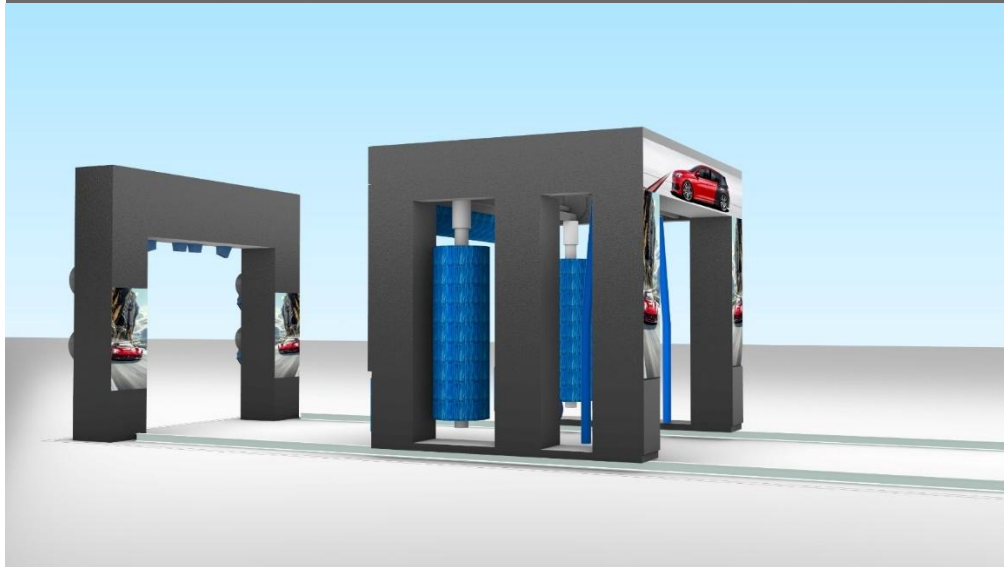

Single bay install allows the Hybridwash to fit in small spaces, while offering complete wash solutions

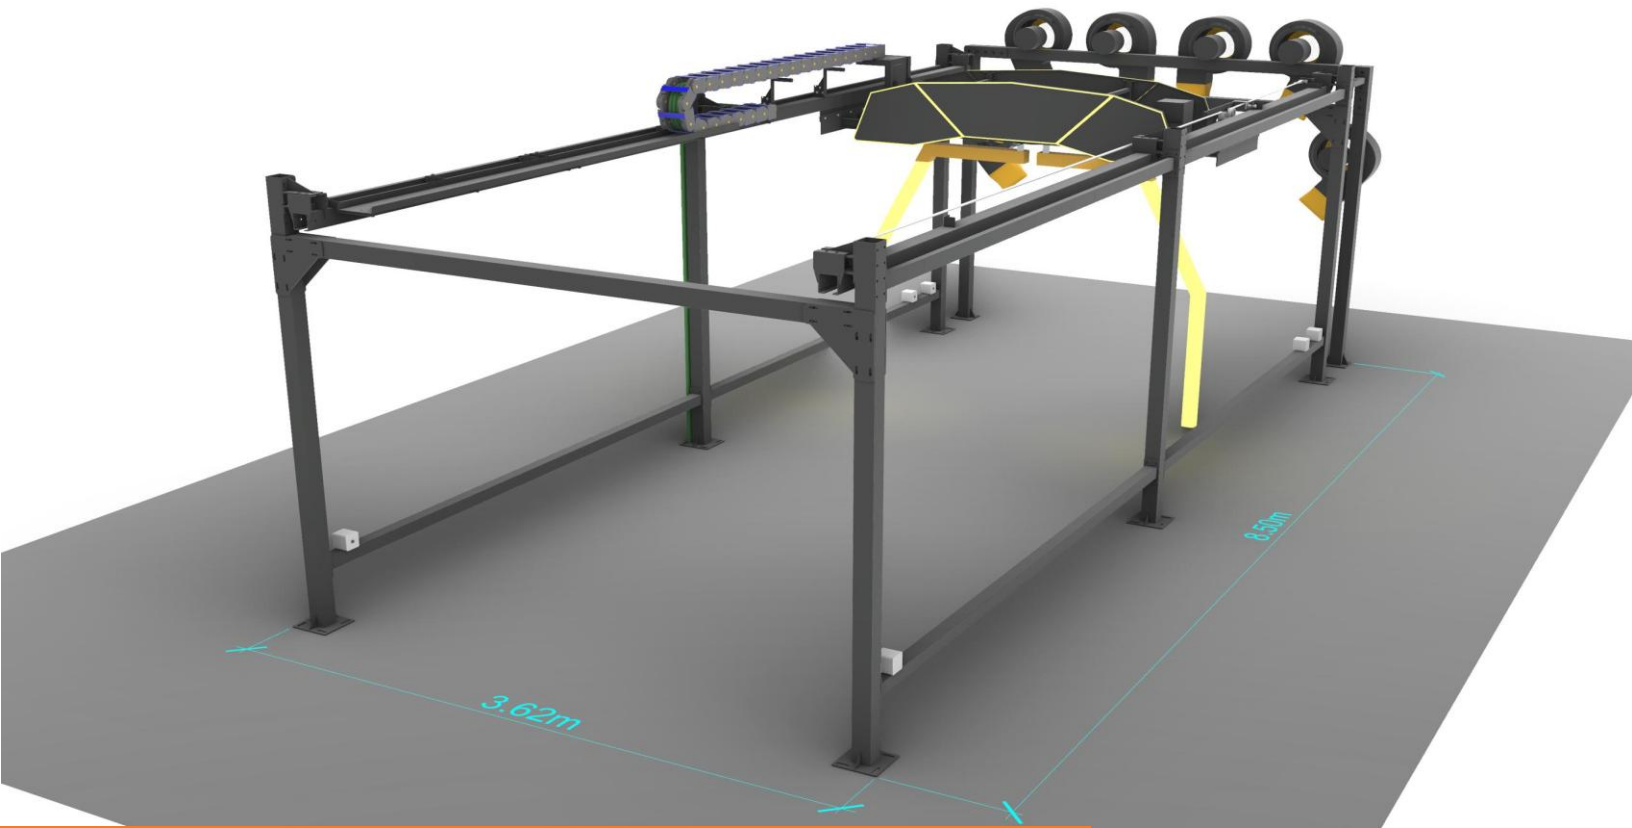

5 brush system plus two-wheel brushes (optional). Two touchless arms. High power drying

Optional LED display and lighting for exciting visuals

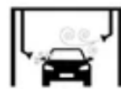

# Touchless Ultimate

Starwash Touchless Ultimate is a high-speed, fully featured car wash system that delivers thorough cleaning in as little as 2 minutes. It combines advanced functions like high-pressure rinse and foam applications with touch-free operation, offering comprehensive cleaning without risk of damage. The system's low-maintenance design ensures hassle-free operation, providing an efficient and convenient solution for keeping vehicles pristine.

2 min wash time

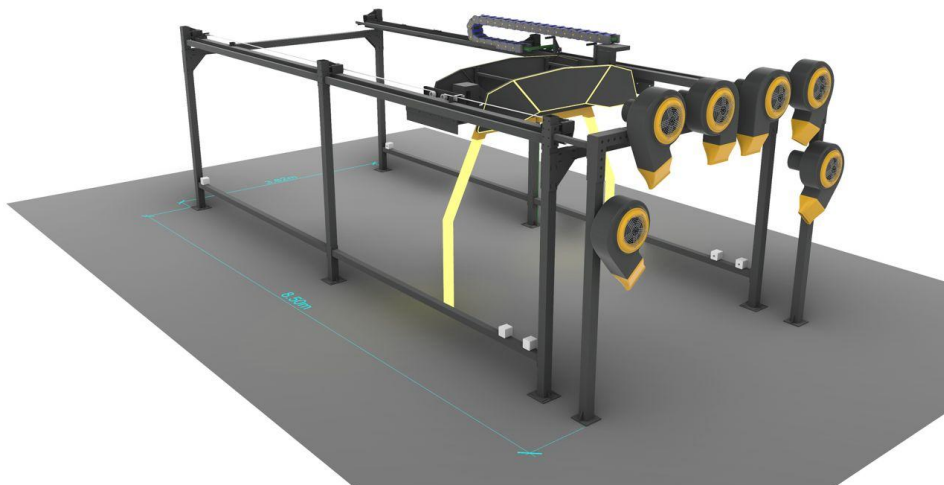

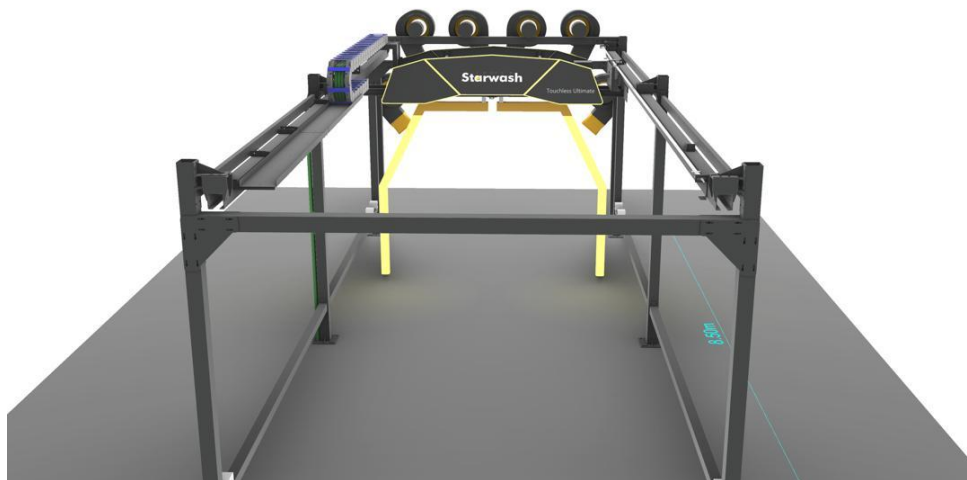

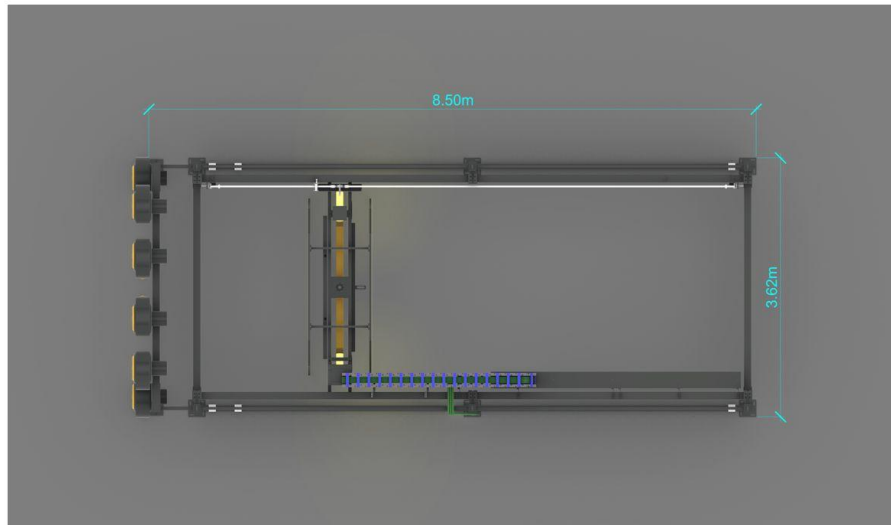

Dual high pressure LED arms

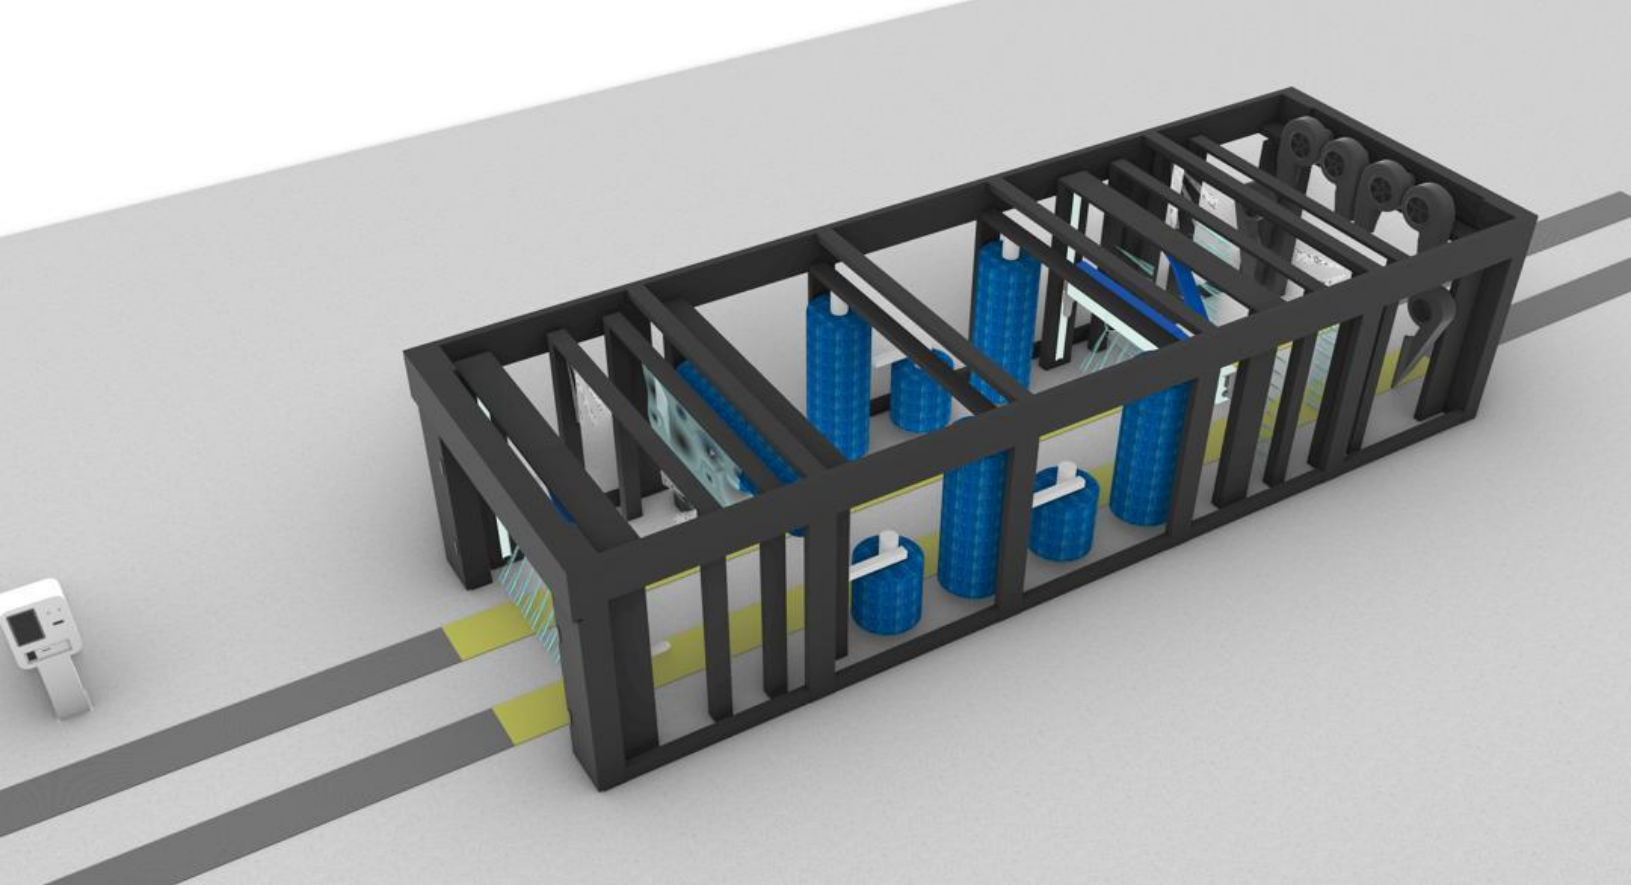

Floor standing frame or wall mount requiring minimal height and width requirements

Optional LED waterfall

# Hybrid Tunnel

Starwash's groundbreaking Hybrid Touch-Touchless Tunnel system features dual 24-inch-wide conveyor belts that simultaneously process two vehicles in 2.5 minutes, offering a revolutionary washing experience. This innovative system seamlessly integrates soft-touch brushes and dual stage high-pressure touchless water jets, providing customers with the flexibility to choose between gentle brush cleaning or water-only washing. With the capacity to handle up to 60 cars per hour, this dual-mode system sets a new industry standard for versatility, efficiency, and comprehensive vehicle cleaning.

9 brush tunnel wash system with trailing brush arms

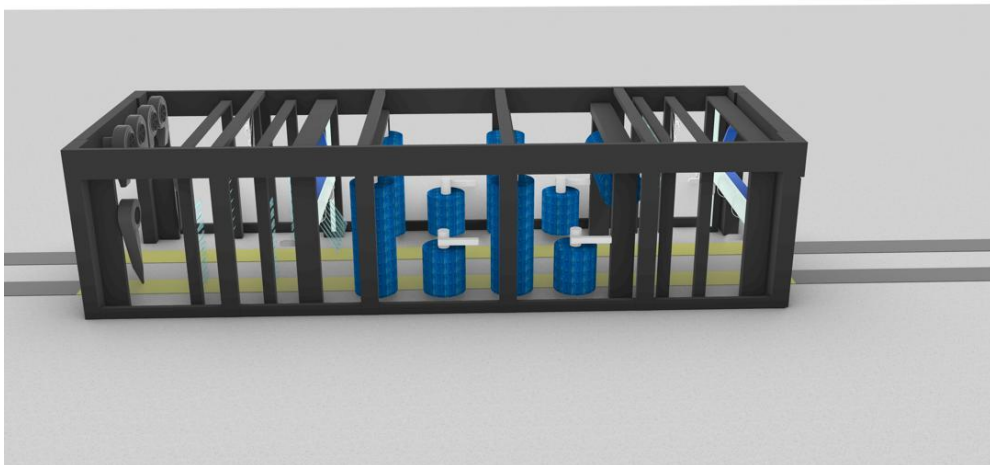

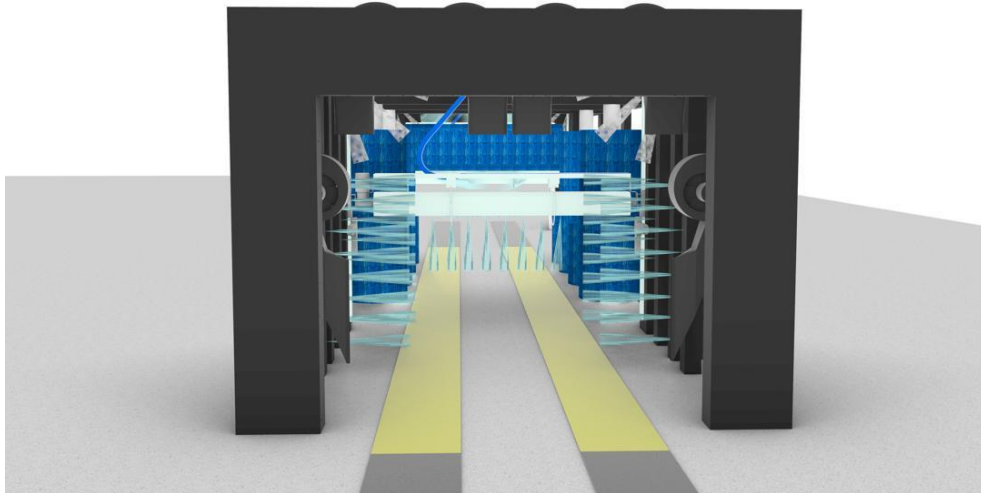

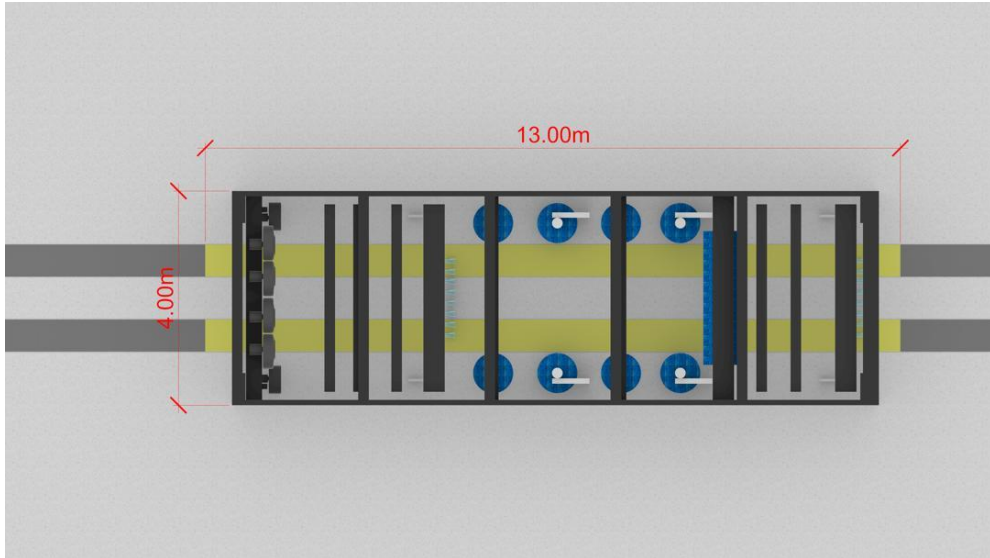

Dual stage contouring high pressure touchless wash system

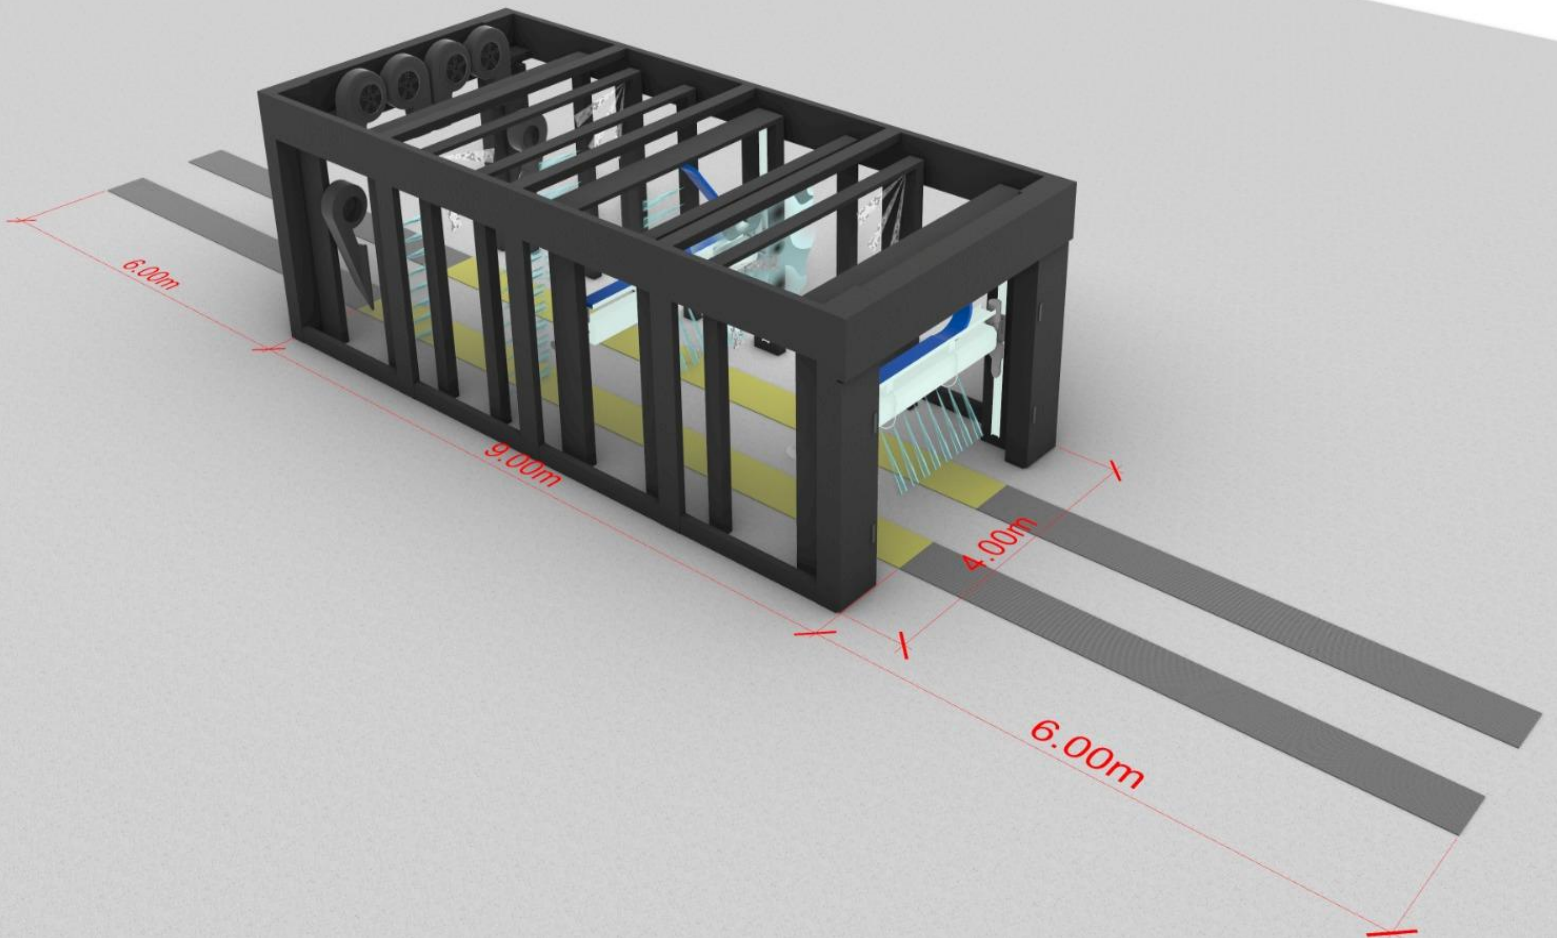

2.5 min wash time including drying

Minimal footprint required. Can retrofit existing IBA or Rollover locations

# Touchless Tunnel

Starwash's revolutionary dual conveyor touchless system features two 24-inch wide belts, enabling simultaneous washing of two vehicles every 2.5 minutes. This innovative design combines high-speed efficiency with advanced touchless cleaning technology, providing a smooth, damage-free wash experience. With a capacity to process up to 48 cars per hour, the system offers unparalleled throughput while maximizing operational efficiency.

2.5 min wash time with two vehicles at a time

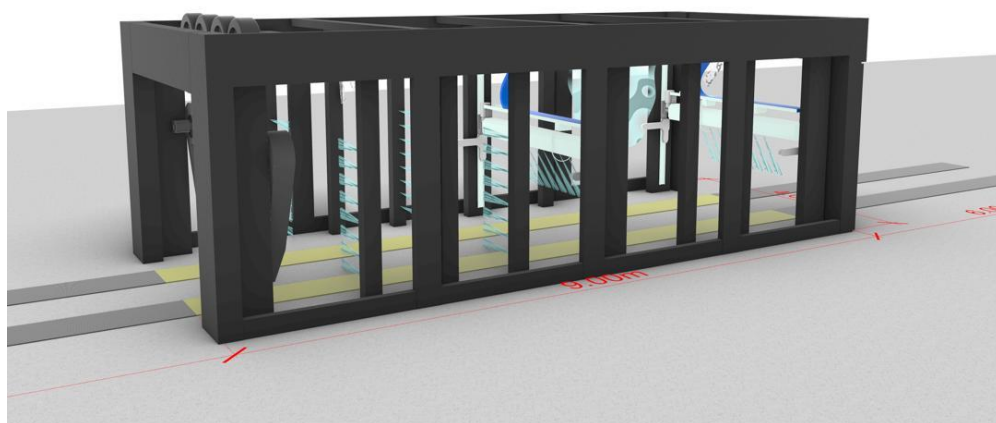

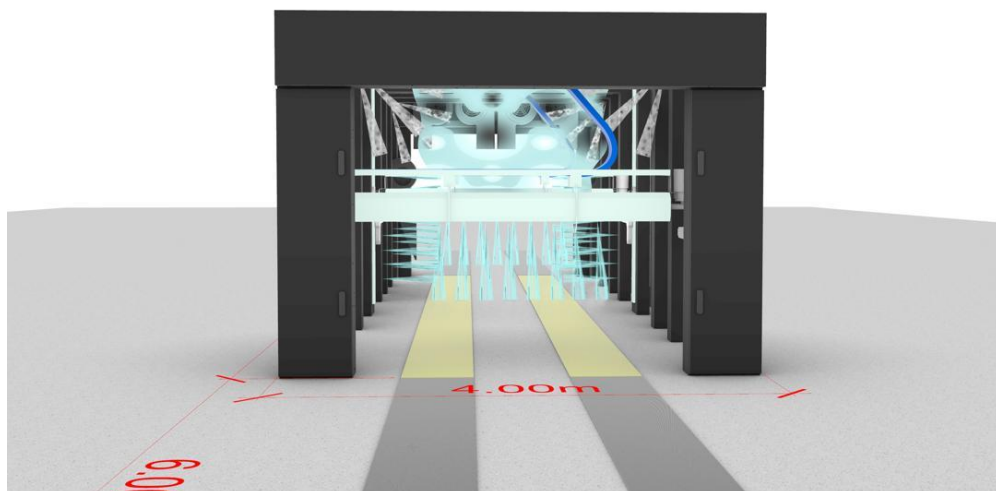

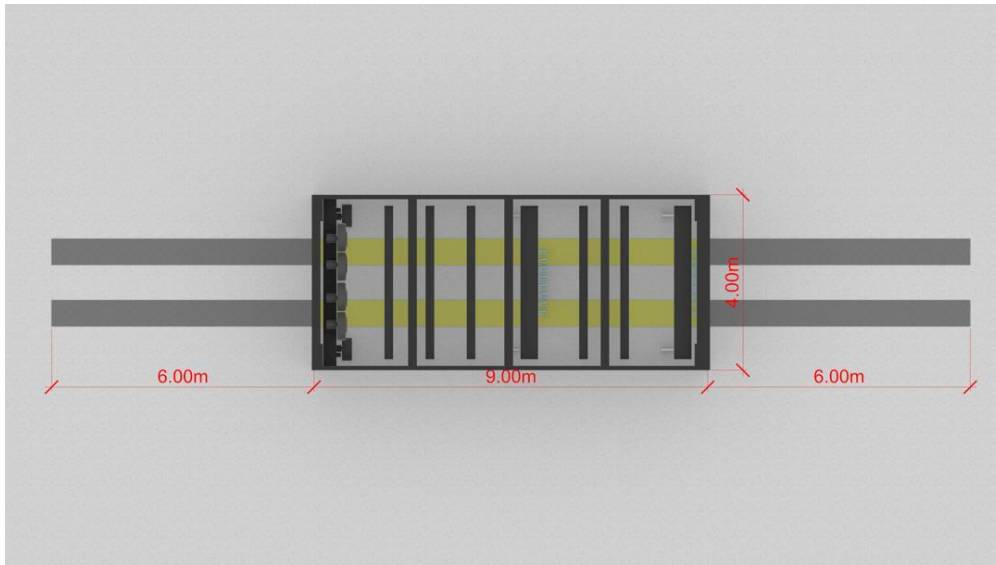

Contouring, dual stage high pressure systems

Triple foam, wax, led waterfall, spot free rinse

Can fit in single bay application with single or dual belt conveyors

# Kiosk

Starwash's advanced kiosk offers lightning-fast touchscreen technology with seamless machine integration. Featuring multiple payment options including credit card, VIP subscription card, cash, QR scan and real-time license plate reading. Our user-friendly interface ensures quick, easy transactions for an optimal customer experience.

Cash or Cashless

Fast & Efficient User Interface

C-Store/ Pay at Pump integration

Auto machine turn-on with  
license plate cameras/ Webcam

Purchase packages/ subscription  
capability

# Water Recycling / Spot Free

Starwash's water recycling system is an innovative and environmentally responsible solution that significantly reduces water consumption (by up to 85%) and operating costs. The system captures, filters, and treats the water used during the washing process, allowing it to be reused for subsequent washes. This closed-loop system includes a series of settling tanks, filters, and treatment processes that remove contaminants, dirt, and debris from the water.

Starwash's spot-free rinse system is an advanced water treatment technology that provides a superior finish for vehicles. Our system uses a process called deionization to remove dissolved solids and minerals, resulting in purified water that leaves no spots or streaks when it dries. It includes a filtration unit filled with mixed-bed resin that captures impurities as water passes

through it. When customers use the spot-free rinse, they can simply wash their vehicle, apply the treated water for the final rinse, and allow it to air dry without the need for hand drying or wiping. This not only saves time and effort but also helps preserve the vehicle's finish by eliminating the risk of scratches from towel drying.

Environmentally friendly (reuse 85% water)

Save operating costs

Clean vehicles better

Removes hand drying requirement

## Digital LED Archway

Starwash's digital LED car wash entry arch is a cutting-edge innovation designed to captivate customers from the moment they arrive. This state-of-the-art arch combines vibrant LED lighting with dynamic digital displays, creating an immersive experience that sets the tone for a premium car wash experience. The arch features customizable graphics and animations, allowing operators to personalize their branding and messaging. Starwash's entry arch is one large interactive digital screen to engage customers and provide instructions or marketing content. By integrating this technology and design, operators can differentiate themselves and enhance

customer satisfaction, ultimately driving business growth through a memorable and engaging car wash experience.

Customizable size and pixel pitch for clarity

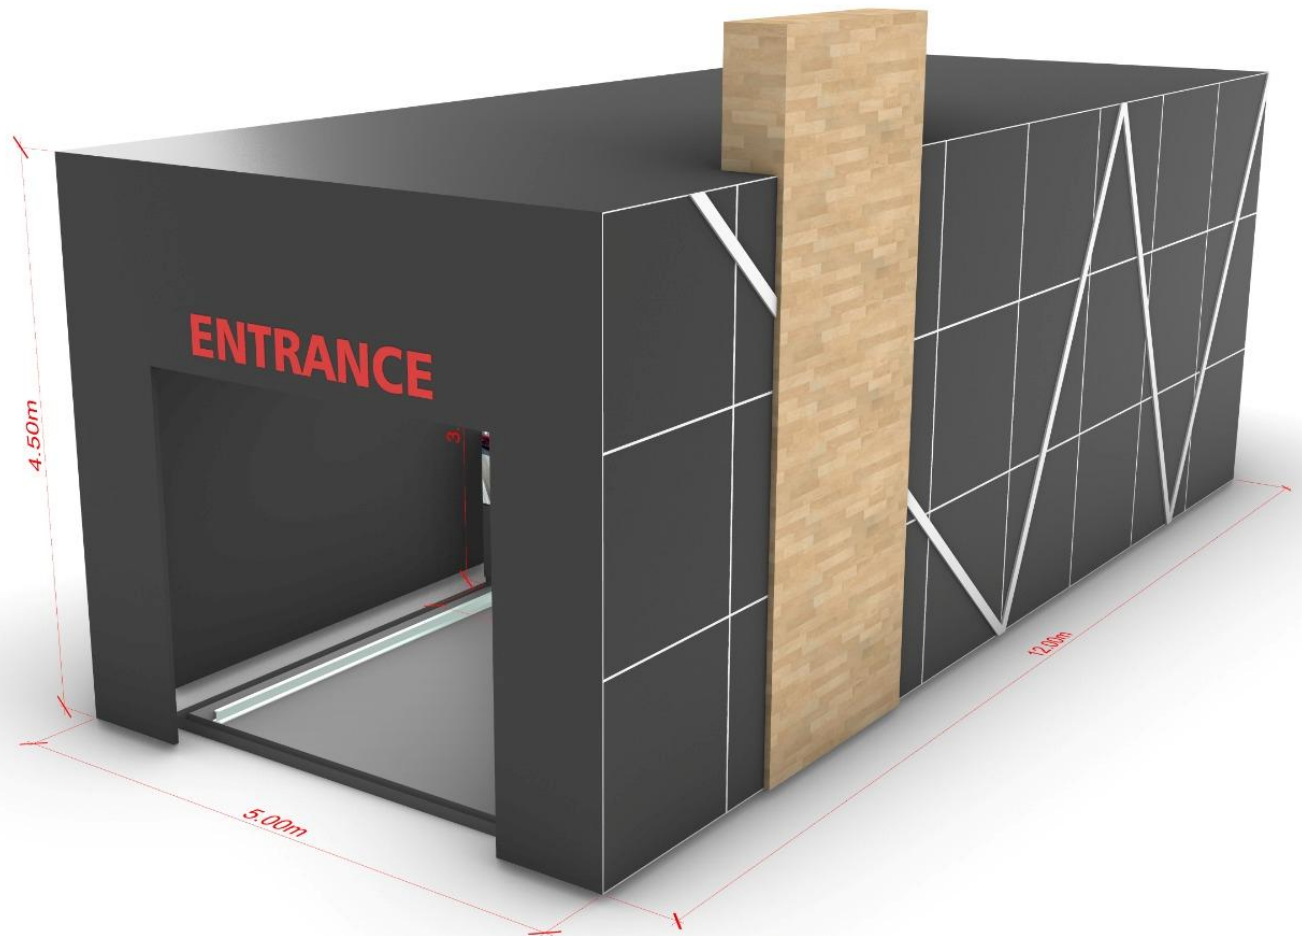

Water sealed design for car wash tunnel use

Adjustable brightness for indoor or outdoor use

Screen can be split any way with camera/video/ image/ vehicle directing/ messaging

## External Structure

Starwash's external structures revolutionize car wash deployment by offering a cost-effective alternative to traditional brick-and-mortar buildings. These pre-engineered solutions can be fully customized to match your brand's unique aesthetic, from color schemes to layout design. Designed for flexibility, our structures allow entrepreneurs to transform vacant land into a professional car wash business quickly and affordably. With options for personalized branding and modular configurations, Starwash provides the perfect turnkey solution for your car wash venture.
